

The safe and healthy workplace.

ISO 45001 Certification

Ensuring a safe and healthy workplace is a key which can unlock superior performance in a company. Modern occupational safety goes far beyond primary accident prevention; a comprehensive preventive approach is called for nowadays. It is important to take into account all risks that could result in work-related physical injury or even disability. These include occupational safety aspects in operational processes as well as stress-related organisational factors that can trigger mental illness. The 45001 standard, which came into force in March 2018, is the only internationally independent standard that defines the requirements for operational health and safety management systems. Certification obtained through DEKRA helps you create a safe and healthy corporate culture.

This is what ISO 45001 stands for

The standard takes a risk-based approach in paving the way for a comprehensive, healthy corporate culture. In order to avoid as many work-related injuries, illnesses and health-risk factors as possible, the conditions throughout the entire supply chain are examined.

The scope of the standard covers all organisational forms larger than that of an individual company.

This includes organisations with multiple locations, and those which work together with multiple contractors, subcontractors, suppliers or temporary workers.

The DEKRA seal identifies your company as being safe and healthy. The certification sends a signal of trustworthiness to your customers. At the same time it increases your competitiveness in the national and international labour market.

The steps to successful certification

Consultation

- Clarification of open questions
- Joint definition of next steps
- Project briefing or optional pre-audit

Document audit & site audit

- Readiness analysis
- Checking the management system for conformity with the standard
- Employee interviews
- Implementation of documented statements in daily business

Audit report containing:

- Results of our analysis
- Where discrepancies arise, pointers to potential areas of optimisation and, if necessary, re-assessment

Certificate and DEKRA seal

- Presentation of certificate upon successful completion of certification process
- Award of DEKRA seal for the duration of your certificate

We are DEKRA Certification

Unique expertise: covering all aspects of quality, safety, health and sustainability, DEKRA Certification provides a comprehensive range of services, with over 1,000 specialists worldwide. The figures speak for themselves: roughly 30,000 companies in more than 50 countries already make use of our certification, test and inspection services. With maximum efficiency we help them achieve their own individual targets. What can we do for you?

The advantages of certification

- Exemplary status as a socially responsible company and as a reliable business partner – powerful arguments when it comes to securing contracts
- Motivational effect on corporate culture thanks to clearly optimised working conditions
- Increased economic and performance efficiency through the reduction and avoidance of cost-intensive downtimes and minimisation of liability risks
- Active management of health risks and compliance with legal requirements
- Integration into existing management systems such as ISO 9001:2015 and ISO 14001:2015

The DEKRA seal of excellence

Signalling maximum quality and reliability – across different industries and internationally. The DEKRA seal is an excellent hallmark and marketing instrument which helps set you apart from the competition. Use it to show your customers and business partners the value of what you offer. We are here to help you.
